Rules

1. Ask one person in your class a question about a square on the sheet. If that person represents that square, then he/she can sign the square.
2. You may ask each person only one question at a time, but you can go back to them more than once.
3. You cannot sign a square on your own sheet.
4. There is a time limit so when the teacher calls, STOP, the person who has the most squares covered on the sheet will receive a prize.
